

MIMONY MART · MOBILE APP

Role-Wise Feature Matrix

A complete breakdown of what each of the 9 mobile login roles can see and do — bottom navigation, dashboard, quick actions, and the More menu — derived directly from the app's role-gating logic and the backend's real permission model.

Generated 2026-07-20 · final_mobile_pos (Flutter)

Roles covered

- 1. Tenant Administrator (Admin)
- 2. Branch Manager (Manager)
- 3. Cashier
- 4. Supervisor
- 5. Inventory Staff (Storekeeper)
- 6. Warehouse Manager
- 7. Warehouse Staff
- 8. Auditor
- 9. Accountant (Finance User)

Every role also gets four universal items — **Policies & Conditions**, **Settings**, **Profile**, and **Sign Out** — listed once at the end rather than repeated per role.

1. Tenant Administrator (Admin)

Full system access — every module, every permission flag (View/Create/Edit/Delete/Approve/Export) across all 30 real backend modules. Only role with the 3 ACL screens.

AREA	FEATURES
Bottom Nav	Dashboard · Orders · POS (center scan button) · Inventory · More
Dashboard	• Today's Orders / Pending Orders / Low Stock Items / Close-to-Expiry stat cards • My Shift card (opening cash, sales, orders) if a shift is open • Reports preview: My Shift, Check-In/Out, Opening Cash, Closing Cash (4 tiles, "View all" → Other Reports) • Cashier KPI table (today's sales per cashier, mart-wide) • Branch Performance table (today's sales per branch)
POS / Orders / Inventory tabs	Scan/search products, Cart, Checkout (Cash/Card/Wallet/Split/Transfer), Invoice & receipt printing, Held Orders · Full Orders list with filters · Inventory: view/add/adjust stock, Receive Stock, Wastage & Spoilage entry
More menu	• Returns — process/approve customer refunds • Check-In / Out Report, Opening Cash Report (staff attendance oversight) • Other Reports — full 24-report grid (Sales & Performance, Cash & Shifts, Inventory, Terminals & Compliance) • Manager Approvals — cash-variance & refund approval center • Terminal Bird-Eye — live status of every POS terminal mart-wide • Warehouse — stock across every warehouse • Pending Transfers — approve/reject stock-transfer requests • Audit Logs — personal activity trail • Roles & Permissions (ACL) — create/edit roles, 6-flag permission matrix per module • User Role Assignment — reassign roles, enable/disable accounts • Approval Rules — configure threshold-based approval routing

2. Branch Manager (Manager)

Same operational scope as Tenant Admin, scoped to their own branch server-side; no access to the 3 mart-wide ACL screens.

AREA	FEATURES
Bottom Nav	Dashboard · Orders · POS (center scan button) · Inventory · More
Dashboard	Identical to Tenant Admin's dashboard — order/stock stats, reports preview, Cashier KPI table, Branch Performance table.
POS / Orders / Inventory tabs	Same as Tenant Admin — full POS checkout, order management, inventory receive/adjust.
More menu	• Returns, Check-In/Out Report, Opening Cash Report • Other Reports (full 24-report grid) • Manager Approvals, Terminal Bird-Eye • Warehouse, Pending Transfers • Audit Logs (personal activity)

Not shown: **Roles & Permissions, User Role Assignment, Approval Rules** (Tenant Admin only) · No personal shift check-in/out items (Manager isn't a Cashier — see note below).

3. Cashier

The only role built entirely around running a personal register shift, start to finish.

AREA	FEATURES
Bottom Nav	Dashboard · Orders · POS (center scan button) · Inventory (view stock only) · More
Dashboard	• Today's Orders / Pending Orders / Low Stock / Close-to-Expiry stat cards • My Shift card — opening float, my sales, my order count • Reports preview (My Shift, Check-In/Out, Opening Cash, Closing Cash) No Cashier-KPI table or Branch-Performance table — manager-only view.
POS tab	Quick Scan (Scan for POS Billing / Scan to Add Inventory / Scan Receipt-Order) · Cart · Checkout — Cash, Card, Wallet, Split, Transfer · Invoice/receipt printing · Held Orders
More menu	• Employee Check-In, Opening Cash, My Shift, Held Orders — cashier-only shift lifecycle • Closing Report — close own shift, count cash, submit variance • Employee Check-Out • Returns — create refunds; over-threshold refunds route to a manager

Not shown: Check-In/Out Report, Opening Cash Report, Other Reports, Manager Approvals, Terminal Bird-Eye, Warehouse, Pending Transfers, Audit Logs, all 3 ACL screens.

4. Supervisor

Manager-tier oversight authority without a POS register — real "POS" module permission is false for this role.

AREA	FEATURES
Bottom Nav	Dashboard · Orders · Inventory · More (<i>no POS/scan button</i>)
Dashboard	- Pending Approvals, Today's Sales, Low Stock Items, Branch-name stat cards - Quick actions: Manager Approvals, Terminal Bird-Eye, Returns, Cashier Performance Report
More menu	- Returns, Check-In/Out Report, Opening Cash Report - Manager Approvals, Terminal Bird-Eye - Warehouse, Pending Transfers

Not shown: Other Reports grid, Audit Logs, POS/Orders-creation, all 3 ACL screens.

5. Inventory Staff (Storekeeper)

Branch-level stock ownership — receiving, adjusting, and returning stock to a warehouse (with approval).

AREA	FEATURES
Bottom Nav	Dashboard · Inventory · More (<i>no Orders, no POS</i>)
Dashboard	- Low Stock, Expiring Soon, Pending Returns stat cards - Quick actions: Branch Inventory, Receive Stock, Report Waste/Damage, Return to Warehouse (needs Manager/Admin/Warehouse Manager approval), Wastage & Spoilage Report - Expiring-batches list (product, batch #, days left)

More menu: no Returns/Reports/Warehouse/Approvals/Audit items — real permissions exclude all of them; everything Inventory Staff needs lives on the dashboard itself.

6. Warehouse Manager (new role)

Full warehouse-operations authority — created this cycle to own supply-to-branch and transfer approvals.

AREA	FEATURES
Bottom Nav	Dashboard · Warehouse · More
Dashboard	- Warehouses count, Low Stock, Pending Approvals, Stock Value stat cards - Quick actions: Warehouses, Supply to Branch (create warehouse → branch transfer), Pending Transfers - Recent Transfers list (source → destination, status, item count)
More menu	Pending Transfers

Warehouse item omitted from More menu — already the dedicated bottom-nav tab. No Returns/Other-Reports/Audit access.

7. Warehouse Staff

Day-to-day warehouse floor work — view-only on transfers; approving/receiving is a Warehouse Manager action.

AREA	FEATURES
Bottom Nav	Dashboard · Warehouse · More
Dashboard	- Warehouses, Items in Stock, Low Stock, Incoming Shipments stat cards - Quick action: Warehouse Stock (view levels + item detail) - Incoming Shipments list — read only, no receive/approve button (real permission has no Approve flag on Stock Transfers for this role)
More menu	— (universal items only)

8. Auditor

Pure read-only oversight — no Create/Edit/Approve flags on any module in the real permission matrix.

AREA	FEATURES
Bottom Nav	Dashboard · More (<i>no Orders, POS, Inventory, or Warehouse tab</i>)
Dashboard	- Critical Events, Failed Logins, Overrides, Configuration Changes stat cards (rolling 7-day Audit Trail KPIs) - Quick actions: Audit Trail, VAT/ZATCA Report, Discounts Report, My Activity (personal sign-in/action log) - Recent Events list (action, user, module, severity)
More menu	— (universal items only)

Deliberately excluded everywhere: Returns, Warehouse, Other-Reports grid, Manager Approvals, Pending Transfers — an Auditor's oversight tools are all on the dashboard, and none of them are edit-capable.

9. Accountant (Finance User)

Finance/tax oversight plus the one real approval action this role owns: expense sign-off.

AREA	FEATURES
Bottom Nav	Dashboard · More
Dashboard	- Pending Expenses, VAT Collected, Gross Margin, Gross Profit stat cards - Quick actions: VAT/ZATCA Report, Tax Report, Fees Report, Profit Margin Report - Pending Expenses list with real Approve/Reject buttons
More menu	Returns (view/approve), Warehouse (view)

Not shown: Check-In/Out or Opening Cash reports, Other Reports grid, Manager Approvals, Terminal Bird-Eye, Audit Logs, Pending Transfers, ACL screens.

Universal, every role: Policies & Conditions · Settings · Profile · Sign Out.

Not covered: *Self-Checkout Kiosk* exists as a real backend role but drives the separate self-checkout web kiosk product, not a staff mobile login, so it's excluded here.

Source of truth: `lib/features/home/home_shell.dart` (bottom-nav gating), `lib/features/more/more_screen.dart` (More-menu gating), `lib/features/dashboard/role/*.dart` (per-role dashboard bodies), cross-checked against the live backend's `RolePermission` rows (View/Create/Edit/Delete/Approve/Export per module) via `GET /api/roles`.
